- Creekside Intersection Improvements – PECO (ULS) is continuing work on the gas relocation and is closing the final section of Stenton between Joshua and Flourtown during the day time between 7am-3:30pm. They are flagging in the intersection in order to complete the necessary work. They informed us that they are waiting on a valve to be ordered which will take several weeks to come in. As a result they will need to pull off the job around February 21st. They will be back in mid-March to finish the PECO connections. JDM will be back in mid to late March and will be permanently closing the section of Stenton that is under a day time detour in order to install storm sewer and reconstruct the road. They anticipate an end of April completion of the project.
 - Joshua/Stenton – the Board awarded the contract to Highway Materials, Inc. We anticipate they will begin the work following the completion of the current intersection improvements. We will have more details on a start date and detour schedule by next month.
- Montgomery County is continuing with the temporary repairs to the W. Valley Green Bridge. The Township met to review a signage plan to alert motorist of the height and weight restrictions leading up to the bridge. They are on track to have this work completed by the end of March.
